

SCHAUMANN – Partner for Agriculture

H. Wilhelm Schaumann, our company's founder, was a pioneer in livestock production. As long ago as 1938 he developed, produced and sold minerals and vitamins for animal nutrition. The SCHAUMANN group is grounded in that tradition. The guiding principle is to help farmers breed success.

Today SCHAUMANN is the leading supplier of mineral products and nutritional supplements for livestock diets and concepts for feed and production hygiene. HÜLSENBERGER ZUCHTSCHWEINE have been a byword for profitable pig production among piglet producers and pig fatteners for four decades.

Innovative, tailor-made solutions based on effective research and development and consistently high quality are the mainstay of the company's success. Expert individual advice on the spot ensures that farmers get the best out of our products. With SCHAUMANN as a partner, success is programmed into animal production through expertise, creativity and reliability.

Globalisation brings new challenges. Schaumann Agri International GmbH in Pinneberg and Schaumann Agri Austria GmbH & Co. KG in Brunn, Austria, were set up specifically to handle our export activities. This ensures that the successful Schaumann philosophy is efficiently implemented worldwide – for the benefit of our customers and commercial partners.

SCHAUMANN minerals and nutritional supplements:

SCHAUMANN provides tailor-made, tried and tested feeding concepts for:

- all farm animals,
- diverse production types,
- a wide range of feeding systems.

SCHAUMANN quality means:

- Stringent quality control of all raw materials and SCHAUMANN products.
- High mixing accuracy honed by decades of experience and the use of state of the art mixing technology.
- High digestibility and efficient utilisation are the key factors in the selection of our raw materials.
- SCHAUMANN has GMP+ certification.

SCHAUMANN feed preservation

Hygienically safe forage is the prerequisite for top performing, healthy animals:

- Reliable preservation of cereal and feed mixtures with SCHAUMASIL and SCHAUMACID
- Efficient ensiling of the forage with specialised silage additives from the BONSILAGE range of products
